The Commonwealth of Massachusetts

DEPARTMENT OF CORPORATIONS AND TAXATION,
STATE HOUSE, BOSTON, June 1, 1931.

As Commissioner of Corporations and Taxation, I submit herewith the Twenty-fourth Annual Report on the Statistics of Municipal Finances of the cities and towns of the Commonwealth for the financial year 1929. This report was prepared under the immediate direction of Mr. Theodore N. Waddell, Director of Accounts in the Department, and contains data relative to the finances of the municipalities of the Commonwealth, together with tabulations compiled from the returns made by the several city and town officials.

HENRY F. LONG,

Commissioner of Corporations and Taxation.

[i]

MAY 29 1957

The Commonwealth of Massachusetts
**REPORT ON THE STATISTICS OF
MUNICIPAL FINANCES — 1929**

HON. HENRY F. LONG, *Commissioner of Corporations and Taxation,*
State House, Boston.

SIR:—I submit herewith the Twenty-fourth Annual Report on the Statistics of Municipal Finances, covering the years ending between November 30, 1929, and March 31, 1930.

The report is similar in arrangement to those of previous years, and makes available comparative data of the receipts and expenditures of the several municipalities. The annual presentation of these statistics makes possible a comparison from year to year of the increase or decrease of revenues and expenses of the cities and towns as well as the aggregates for all municipalities.

The chief source of revenue is from taxes, 79.83 per cent being received from this source, a slight decrease over the previous year, due to the fact that for the first time automobiles were assessed as an excise tax instead of being assessed as personal property. The amount received from this excise tax was more than 2.5 per cent of the total revenue received. The exact benefit to real estate of assessing automobiles in this way cannot be measured, as there is no complete data as to the amount collected as a property tax on the automobile prior to 1929. But little change in the relative amounts of other receipts is shown.

Expenditures show increases in every class, with the exception of general government, the increase being proportionately the same throughout the several classes.

FINANCIAL STATUS OF THE MUNICIPALITIES.

Excess or Deficiency of Revenue.

The tables on pages x to xiii give a summary for five years of revenue for current charges and current charges against revenue. In classifying expenditures, maintenance and operation are distinct from outlays; therefore, these tables do not include any portion of capital expense. The report is prepared on a cash basis rather than on revenue and expense, and by considering these tables for a series of years accurate conclusions may be drawn as to the policies and methods of financing followed in the several municipalities.

For several years, cities and towns have been prohibited from issuing debt for general purposes until a certain percentage of the loan had been appropriated for the same purpose from available revenue funds or voted to be raised by taxation. Annually recurring expenses of whatever nature should be reflected in the tax rate, so that under normal conditions we should have an excess of revenue for current charges over current charges against revenue in practically every municipality. Municipalities can and should, in prosperous times, conserve their savings and build up a reasonable reserve to be drawn upon in case of abnormal needs. Under the system of assessing to meet governmental costs, we are operating three-quarters of the year on borrowed money, so that the reserve referred to, in most cases, if actually accumulated, is offset by accounts receivable, and in every case it will be offset either by accounts receivable or authorized municipal expenditures.

The total revenue for current charges for the year 1929 increased \$10,221,925, or 3.76 per cent, while the current charges against revenue increased \$9,592,485, or 3.80 per cent.

The amount expended for outlays was \$59,045,358, a decrease over the preceding year of more than \$800,000. The largest outlay for any single function was for highways, which shows an expenditure of \$21,382,253. Other large items for outlays are schools, \$13,579,575; health and sanitation, \$8,521,828; water supply, \$6,235,066; protection of persons and property, \$1,690,019; recreation, \$1,373,620; and charities, \$1,362,648.

Many of the improvements are financed in part by the incurrence of debt, but any portion of such expenditure which represents an annually recurring expense ought not to be financed by means of a loan. The tendency in many towns is to appropriate direct from taxation a larger proportion of the cost of the improvement than is required under the statute, and loans, if issued, are often for a shorter period than is required under the law. This method is more closely followed in the towns than in the cities, thus permitting the towns to have a greater percentage of the tax dollar for labor, materials and supplies, which means an actual reduction in the tax rate or provides additional service for the general welfare of the community.

The greatest need today in our cities and towns is to develop a construction program for a definite but not unreasonably long period, and to get away from the year-to-year program which is apt to be adopted without thought of its relation to other necessary municipal activities, or of the ultimate effect on the tax rate. There must be some provision in municipal management that will offset these periods of economic depression that appear with regular frequency.

A comparison of revenue for current charges and current charges against revenue for the years 1928 and 1929 for all municipalities, together with percentages each class of receipt bears to the total receipts, and the cost of each function of government as compared with the total expenditures, also a comparison of the expenditures for outlays for the years 1928 and 1929, will be found in the following tables:

Revenue for Current Charges.

CLASSIFICATION.	1928	1929	PERCENTAGES

The Debt Burden.

The net funded or fixed debt of all municipalities at the close of the year 1929 was \$284,131,802, an increase over 1928 of \$2,181,556, or 0.77 per cent. The assessed valuation of taxable property increased during this period \$318,488,319, or 4.4 per cent.

On pages xxi to xxvii tables are presented showing the net debt on January 1, 1931 for cities, towns over 5,000 population and towns under 5,000 population. The total net debt on January 1, 1931 for all municipalities was \$303,725,731, an increase over that reported for January 1, 1930 of \$20,123,755, or 7.10 per cent. Of the increase in indebtedness, \$11,792,882 was what we term general debt, or debt that will be retired by direct taxation, and \$8,330,873 was municipal enterprise debt which, as a rule, is retired from earnings of the enterprise and does not become a direct charge against real estate.

The increase in general debt for the cities was \$10,365,754, or 6.24 per cent; for the towns over 5,000 population it was \$1,265,279, or 3.81 per cent; and for the towns under 5,000 population, \$161,849, or 2.27 per cent. In making this comparison it should be borne in mind that the change in population in 1930 placed Foxborough, Somerset, Tewksbury, Billerica and Auburn in the towns of over 5,000 population, while Monson was taken from this group and included in the towns of less than 5,000 population. The cities continue to increase their indebtedness at a rate in excess of that of the towns. However, it is gratifying to note that a number of our cities that have experienced an actual decrease in taxable property due to the loss of manufacturing plants have shown a decrease in indebtedness. A reduction of debt and interest charges is essential if we are to maintain our present tax rates, and with less borrowing it is possible, in many cases, to maintain all of the essential activities without unreasonably increasing the tax rates, if we utilize to the fullest extent the savings in debt and interest charges.

Comparing the net debt figures for the year 1930, as shown in the tables on pages xxi to xxvii, with the net debt for 1929, as shown in the table on page xx, we find that the increase in 1930 over 1929 was greater than for any of the past twenty years, and we cannot overlook the fact that improvements made by borrowing add from ten to sixty per cent to the cost, the amount depending on the period of the loan.

The policy of restricting loans to certain definite purposes and of limiting the period to within the life of the improvement, and also, the provision requiring an initial contribution from revenue as a condition precedent to certain borrowings, have put the municipalities of this Commonwealth in a better financial condition than those of any other state. In making comparisons of debt figures, we must not overlook the fact that in some states the district and special assessment debts are far greater than the general obligations of the municipality, and without taking these into account the comparisons are misleading and false conclusions are drawn.

THE CERTIFICATION OF TOWN AND DISTRICT NOTES.

This particular branch of the work is constantly increasing, as many of the towns are issuing their loans in the form of notes instead of bonds, as formerly; also the demands of investors for information relative to the finances of cities and towns have compelled us to compile much additional data for ready reference. This branch of the work should be extended along other lines as it would soon demonstrate its value as in the case of detailed data of municipal indebtedness thus far obtained.

The number of notes certified and the amount of the loans represented by them since the town note act took effect January 1, 1911, are shown in the following table:

YEARS.	REVENUE AND OTHER TEMPORARY LOANS		GENERAL LOANS		TOTAL	
	Number	Amount	Number	Amount	Number	Amount
1911 . . .	983	\$8,974,214.59	433	\$737,349.43	1,416	\$9,711,564.02

¹ To June 1.

THE AUDITING OF ACCOUNTS AND THE INSTALLATION OF ACCOUNTING SYSTEMS.

During the past year, systems have been installed in six cities and towns. In addition, 183 audits have been made and assistance has been rendered in two other cities and towns. Systems have now been installed in 205 cities, towns and districts.

The demand upon the Division for this particular branch of the work is constantly increasing, and while with the force of examiners now engaged in the work we are able to make many additional audits, as yet we are unable to cause an audit to be made as often as once in two years as permitted by statute.

The auditing, as it is done by the examiners, amounts to more than the checking of figures to locate possible errors. A general cooperative study of the financial condition in the several municipalities is demanded as well as the checking for errors, and in my opinion great benefit is resulting from this study, for better accounting as well as better planning of municipal expenditures is accomplished.

But little increase to the force of examiners is planned for the immediate future, for it is expected that with improved accounting practices in our municipalities and a more thoroughly trained force more audits can be made with the force at hand.

CONCLUSION.

I wish to extend to the entire force my sincere appreciation of the work performed by them during the past year, especially to Mr. Edward H. Fenton, Deputy Director and Chief Accountant, in charge of the auditing and installation of accounting systems, and to Miss Hannah M. Varney, in general charge of the clerical work and the preparation of the tabulations of this report.

Respectfully submitted,

THEODORE N. WADDELL,
Director of Accounts.

STATE HOUSE, Boston, June 1, 1931.

PLAN OF THE REPORT.

The statistical presentations of this report, following the introductory matter, are arranged in three principal parts, devoted respectively to the finances of (I) the 39 cities; (II) the 83 towns having a population of 5,000 or over; and (III) the 233 towns having a population of less than 5,000. In all the tabulations, unless otherwise indicated, the cities and towns are arranged in order of population for convenience of comparison.

PART I. — CITIES.

This part is subdivided as follows: — (A) Summary of Financial Transactions; (B) Receipts from Revenue; (C) Payments for Maintenance and Interest; (D) Indebtedness; and (E) Cash Balances.

(A) *Summary of Financial Transactions.*

This division consists of a summary table (designated Table I) or general survey of all the financial transactions of the 39 cities of the Commonwealth (pp. 4-27). The several cities, with the exception of Boston, which has financial transactions of such magnitude as to warrant presentation independently of the other cities, are arranged, for purposes of comparison, according to the population of the United States Census of 1930, typographical considerations making it necessary to adopt an arbitrary grouping of four municipalities to a page.

(B) *Receipts from Revenue.*

Table II (pp. 30, 31) shows receipts from *General* and Table III (pp. 32, 33) receipts from *Commercial* Revenue. The former consists of taxes, licenses and permits, fines and forfeits, grants and gifts, and all other general revenue; while the latter is composed of revenue from special assessments (whether for expenses or outlays), privileges, departmental earnings, public service enterprises, cemeteries, and interest.

Table IV (pp. 34-42) is an exhibit of classified Departmental Earnings (being the detail of Column D of Table III), from which may be seen the amount of revenue received by the several municipalities from their various departments. Unclassified receipts are excluded because of their diversity. This table is self-explanatory and is suggestive as disclosing the varying degree to which different cities have discovered opportunities for revenue from this source.

Table V (p. 43) is a tabulation of interest receipts classified so as to show the amount of interest derived from money on deposit, from deferred taxes and special assessments, from public trust funds (sub-classified according to particular funds, so far as is practicable), from investment funds, and from miscellaneous sources.

Table VI (p. 44) presents a summary of revenue receipts, giving within the scope of a single table in a form convenient for comparison the receipts from all sources of revenue of the 39 cities.

It is of interest to note that of the total revenue receipts of the 39 cities of the Commonwealth for the year covered by the report, 81.1 per cent is from general revenue sources and 18.9 per cent from commercial revenue sources. The revenue receipts of the city of Boston are 80.7 per cent from general and 19.3 per cent from commercial sources.

(C) *Payments for Maintenance and Interest.*

The tables in this division, VII to X, inclusive (pp. 46-68), exhibit gross payments, classified in detail, on account of the maintenance cost, or what are sometimes called the "current expenses" of the various departments or kinds of municipal services. Interest payments are similarly but separately shown, not only because it is desirable to exhibit this item of expense independently, but because interest is properly a capital rather than a departmental charge.

It would be most interesting and significant, too, if we could calculate the net cost of the several municipal services so as to show the actual burden of each upon the taxpayer, and it might be supposed that such a figure could be obtained simply by deducting the earnings of a department from the amount necessary to maintain it; but there is as yet on the part of accounting authorities no clear or general under-

standing as to what receipts should be treated as departmental earnings, thereby constituting a proper offset to expense, and what, on the other hand, being in the nature of an assessment upon the taxpayer rather than a charge upon the citizen, cannot be legitimately deducted from a gross cost figure in order to obtain net cost of maintenance.

In comparing certain departmental expenses, large differences will occasionally be noted for the same class of service, the reason for which is not sufficiently apparent to warrant our attempting to assign it without more or less exhaustive inquiry. Meanwhile the differences, even for a single year, which may be noted in these comparative tables for cities of approximately the same size should stimulate local discussion for the purpose of ascertaining whether a satisfactory explanation can be found.

From the interest table (p. 68) we note that the total interest burden of the 39 cities for the year covered by the report was \$16,912,181.41, of which \$8,133,016.89, or 48.1 per cent, was interest on the general debt; \$2,919,300.43, or 17.3 per cent, was interest on revenue and other temporary loans; and the remaining 34.6 per cent of the total interest payments was for debt on account of public service enterprise and cemetery loans, metropolitan assessments for sewer, park, and water purposes, and miscellaneous debt not specified. It is of interest to note that the total assessment on the city of Boston for interest on metropolitan debts was \$1,797,963.91, or 23.7 per cent of the total interest burden of the city (see also payments to the state sinking and loan funds on page 73). Over 49 per cent of Somerville's total interest burden is on account of metropolitan assessments.

(D) *Indebtedness.*

Table XI (p. 70) shows the outstanding indebtedness classified by the character of the obligation; Table XII (p. 71), the relation of indebtedness to valuation, the valuation figures as reported to the Tax Commissioner being used; Table XIII (p. 72), the debt transactions for 1929, classified according to the character of the obligation; Table XIV (p. 73) shows separately the payments to the state sinking and loan funds; and Table XV (p. 74) shows the method of meeting debt requirements from taxation.

A tabulation which gives figures for the funded or fixed debt and the net debt only of a municipality does not, however, tell the whole story of the debt burden. Revenue loans, it is true, are not included in reckoning the limit of indebtedness under the law; but though they are temporary transactions with uncollected taxes presumably as an offsetting asset, they constitute in fact a permanent burden, since they are as a class annually recurrent. Loans in anticipation of bond issues, although of a temporary character, are in reality *fixed* debt (having no assets as an offset) and in Table XII are included in the total of funded or fixed debt and reckoned in determining the net debt. Table XI (p. 70) has therefore been prepared for the purpose of showing the aggregate outstanding indebtedness, including not only the funded or fixed debt, but also temporary debt and warrants or orders unpaid.

The net funded or fixed debt is found by deducting from the total funded or fixed debt the amount which has been set aside in sinking funds to pay the debt when due. Funded or fixed debt does not include revenue loans or outstanding warrants or orders, because these debts are considered temporary, and it is assumed that such obligations are offset by theoretically "quick" assets. Thus, revenue loans are offset by uncollected taxes, and warrants or orders by cash on hand.

The table of debt transactions (p. 72) is of interest as showing the amount of debt incurred during the fiscal year 1929 for the several purposes specified, and the amount of debt cancelled during the year, excepting payments to the state sinking and loan funds on account of metropolitan assessments for sewer, park, and water purposes, and payments to counties on account of debt incurred for bridge purposes. These payments represent the cancellation of a portion of the city's debt incurred by the State and County on their account, and for this reason are excluded.

Included in the term "General Loans" in the table of debt transactions are not only loans issued for general purposes, but likewise all loans whether specified as for school, fire, or police, etc., purposes, since these could not be shown separately by figures which would be comparable.

Payments to the state sinking and loan funds on account of miscellaneous items and metropolitan sewer, park, and water assessments are shown separately in Table XIV

(p. 73). The aggregate amount thus paid for the 39 cities in 1929 was \$890,093.79 of which *Boston* paid \$493,718.69, or 55.5 per cent.

Table XV (p. 74) is of interest as showing the relative use by the 39 cities of Massachusetts of the two methods of meeting their debt obligations. The payments to the state sinking and loan funds on account of miscellaneous items and metropolitan assessments are included in this table in order to show the annual debt charges against revenue, but they are *assessments* and not properly charged as a serial or municipal sinking fund payment.

(E) *Cash Balances.*

Table XVI (p. 76) shows the amount of cash on hand held by the treasurer and departments at the beginning and close of the fiscal year 1929.

PART II. — TOWNS OVER 5,000 POPULATION.

The subdivisions of this part are as follows: — (A) Summary of Financial Transactions; (B) Indebtedness; (C) Cash Balances.

The subdivisions of this part are as follows: — (A) Summary of Financial Transactions similar in form and detail to those given for the cities in Part I, the towns being arranged according to population, with the exception of Brookline, the largest town, which is presented separately as its transactions are scarcely comparable with those of any other town. The tables in the division devoted to *Indebtedness* (II, III, IV, V, and VI, on pp. 128-135, inclusive) are similar to those given for the cities, and the comments made in the latter connection are likewise applicable to the towns. The statements of *Cash Balances* (pp. 138, 139) for the towns are also self-explanatory.

PART III. — TOWNS UNDER 5,000 POPULATION.

The tables in Division A, *Summary of Financial Transactions* (pp. 80-125), are actions; (B) Indebtedness; (C) Cash Balances. They are presented on the same plan as the towns of over 5,000 population, which are shown in Part II.

ANALYSIS TABLES

- I. Excess or Deficiency of Revenue
 - A. Cities
 - B. Towns over 5,000 Population
 - II. Revenue Charges for Maintenance, Interest, and Debt Requirements
 - A. Cities
 - B. Towns over 5,000 Population
 - III. Comparative Statement for the Cities of Valuation, Revenue for Current Charges, and Current Charges against Revenue
 - IV. Comparative Debt Statements
 - A. Aggregate Municipal Indebtedness — Comparisons for 1910, 1927, 1928, and 1929
 - B. Aggregate Municipal Indebtedness — General and Enterprise Debt
 - C. Net Funded or Fixed Debt and Assessed Valuation
 - V. Net Debt January 1, 1931, and Ratio of Net Debt to Valuation
 - A. Cities
 - B. Towns over 5,000 Population
 - C. Towns under 5,000 Population

TABLE XII. — *Relation of Indebtedness to Valuation — 1929.*

NOTE.—The valuation given in this table is the assessors' valuation of real and personal property including motor vehicles as of April 1, 1929, together with the supplemental assessment of December, 1929, exclusive of the non-resident bank stock.

The total debt shown in this table is the funded or fixed debt. This amount differs from the total debt shown in Table XI, which includes funded or fixed debt and also temporary debt. If the amount of revenue loans and warrants or orders is deducted from the total debt shown in Table XI, the result will give the funded or fixed debt shown in Table XII.

CITIES.	Population of 1930	Percentage of Net Debt of Valuation	Valuation of 1929 including Motor Vehicles	Total Funded or Fixed Debt	Sinking Funds	Net Funded or Fixed Debt

¹ Includes railroad stock offsetting debt of \$168,000.

² Includes \$94,303.43 investment fund.

TABLE XIII.—*Debt Transactions for 1929 Classified by Character of Obligation.*

NOTE.—The amount of debt as shown in the following table does not include the sinking and loan fund payments to the State and Metropolitan assessments, or payments to counties on account of debt incurred for bridge purposes. For this reason the total amount of cancelled debt as here shown differs from that shown in Table I, Division A, pages 4 to 27, under the section "Municipal Indebtedness."

TABLE III. — *Relation of Indebtedness to Valuation — 1929.*

NOTE.—The valuation given in this table is the assessors' valuation of real and personal property including motor vehicles as of April 1, 1929, together with the supplemental assessment of December, 1929, exclusive of the non-resident bank stock.

The total debt shown in this table is the funded or fixed debt. This amount differs from the total debt shown in Table II, which includes funded or fixed debt and also temporary debt. If the amount of revenue loans and warrants or orders is deducted from the total debt shown in Table II, the result will give the funded or fixed debt shown in Table III.

TOWNS. (Population over 5,000)	Popu- lation of 1930	Percent- age of Net Debt of Valuation	Valuation of 1929 including Motor Vehicles	Total Funded or Fixed Debt	Sinking Funds	Net Funded or Fixed Debt

83 Clinton .	12,817	0.2	16,374,609	202,500.00	\$175,000.00	27,500.00
83 Towns	914,547	2.7	\$1,464,437,625	\$41,068,447.64	\$836,033.42	\$40,232,414.22

TABLE IV. — *Debt Transactions for 1929 Classified by Character of Obligation.*

NOTE.—The amount of debt as shown in the following table does not include the sinking and loan fund payments to the State on account of deepening Neponset River and Metropolitan assessments, or payments to counties on account of debt incurred for bridge purposes. For this reason the total amount of cancelled debt as here shown differs from that shown in Table I, Division A, pages 80 to 125, under the section "Municipal Indebtedness."

Refunding bonds for the current year were issued for water purposes.

TABLE III. — *Relation of Indebtedness to Valuation — 1929.*

NOTE.—The valuation given in this table is the assessors' valuation of real and personal property including motor vehicles as of April 1, 1929, together with the supplemental assessment of December, 1929, exclusive of the non-resident bank stock.

The total debt shown in this table is the funded or fixed debt. This amount differs from the total debt shown in Table II, which includes funded or fixed debt and also temporary debt. If the amount of revenue loans and warrants or orders is deducted from the total debt shown in Table II, the result will give the funded or fixed debt shown in Table III.

There are 64 towns which showed no funded or fixed debt.

TOWNS. (Population under 5,000)	Popu- lation of 1930	Percent- age of Net Debt of Valua- tion	Valuation of 1929 including Motor Vehicles	Total Funded or Fixed Debt	Sinking Funds	Net Funded or Fixed Debt
1 Marshfield . . .	1,625	9.1	\$7,433,599	\$675,000.00	—	\$675,000.00
2 Wilmington . . .	4,013	8.3	4,437,312	366,250.00	—	366,250.00

¹ Less than one-tenth of one per cent.

TABLE IV.—*Debt Transactions for 1929 Classified by Character of Obligation.*

P. D. 79.

NOTE.—The amount of debt as shown in the following table does not include the sinking and loan fund payments to the State on account of deepening Neponset River and Metropolitan assessments, or payments to counties on account of debt incurred for bridge purposes. For this reason the amount of cancelled debt as here shown differs from that shown in Table I, Division A, pages 144 to 263, under the section "Municipal Indebtedness."

The Commonwealth of Massachusetts

DEPARTMENT OF CORPORATIONS AND TAXATION,
STATE HOUSE, BOSTON, June 1, 1932.

As Commissioner of Corporations and Taxation, I submit herewith the Twenty-fifth Annual Report on the Statistics of Municipal Finances of the cities and towns of the Commonwealth for the financial year 1930. This report was prepared under the immediate direction of Mr. Theodore N. Waddell, Director of Accounts in the Department, and contains data relative to the finances of the municipalities of the Commonwealth, together with tabulations compiled from the returns made by the several city and town officials.

HENRY F. LONG,
Commissioner of Corporations and Taxation.

The Commonwealth of Massachusetts

REPORT ON THE STATISTICS OF MUNICIPAL FINANCES —1930

HON. HENRY F. LONG, *Commissioner of Corporations and Taxation,*
State House, Boston.

SIR:—I submit herewith the Twenty-fifth Annual Report on the Statistics of Municipal Finances, covering the years ending between November 30, 1930, and March 31, 1931.

Twenty-five years have now elapsed since the publication of the first report on statistics of municipal finances and many changes have taken place during that period. The accounting practices of our municipalities have undergone great changes, and today it is possible to compare the financial condition of cities and towns throughout the State with a reasonable degree of accuracy. City and town officials fully appreciate the desirability, if not the necessity, of a more careful accounting and reporting of the financial transactions of their municipality. The public at large demands an accounting of the tax dollar, and it is now watching closely the costs of the various activities in order that any economy practiced will not unreasonably affect the municipal service.

This report, having been prepared on the same general plan for a quarter of a century, makes available comparable data that should be of especial value at this particular time when every one is seeking the curtailment of public expenditures. It is essential that the costs of government shall be available, in order that the exact effect on the tax levy, resulting from economies practiced or policies changed as to service rendered at public expense, can be shown.

FINANCIAL STATUS OF THE MUNICIPALITIES.

Revenue and Expenses.

The tables on pages x-xiii, showing excess or deficiency of revenue for current charges and current charges against revenue, are prepared from returns which are based upon cash receipts and disbursements, and, under normal conditions, the figures from such returns, if considered for a series of years, give a true picture of the method of financing the activities of the municipality. Present conditions are mainly responsible for the increase in the amount of uncollected taxes in many of our cities and towns, and if the year 1930 only is considered false conclusions might be drawn.

Revenue received from the various sources is proportionately the same for each class as for the preceding year, the amount received for current charges being \$12,693,240 in excess of the amount received the previous year. Of this amount, \$10,558,659 was received from taxes. All other sources, producing more than two per cent of the total revenue received, show increases over the preceding year.

Current charges against revenue show an increase over the preceding year of \$12,818,227, approximately the same increase as is shown in revenue for current charges. Expenditures show an increase in every function with the exception of highways and interest. General government shows an increase of 6.86 per cent, but this is due to some very definite increases in certain municipalities and not to a uniform increase in all the cities and towns. The report for the previous year showed a decrease in the cost of general government over the preceding year. Highway expenses show a decrease over the preceding year, probably due to the fact that more and better roads are being constructed, the actual and necessary cost of upkeep thereby being reduced. The decrease in interest payments is due almost entirely to the rates charged for temporary loans. Although the amount of temporary debt increased, the cost was less owing to the extremely low interest rates charged.

Expenditures for charities show a material increase, due to the increased expenditures for public welfare, but this increase is spread very generally throughout all the municipalities; the same is true of expenditures for soldiers' benefits. The increase in recreation expenditures is due largely to the Tercentennial celebration. Unclassified expenditures increased, the increase being due chiefly to losses on account of bank failures, to refunds of taxes paid under protest and abated and refunded as a result of a court order, to establishing municipal airports, and to municipal advertising.

The increase in expenditures for outlays over the preceding year was \$8,811,973. A considerable amount of this expenditure was from revenue, since the statute provides that no borrowing can be made for any of the purposes specified in Section 7, Chapter 44, General Laws until a sum equal to twenty-five cents on each one thousand dollars of assessed valuation of the preceding year has been voted to be taken from available funds, or to be raised by taxation for the purposes set forth in the clause under which borrowing is to be made. In many instances, the entire cost of the outlay is taken from revenue. The total expenditure for outlays as shown in the table was \$21,516,083 in excess of the funded debt issued during the year.

A comparison of revenue for current charges and current charges against revenue for the years 1929 and 1930 for all the cities and towns, together with the percentage each class of receipt bears to the total receipts and the cost of each function of government as compared with total expenditures, also a comparison of the expenditures for outlays for the years 1929 and 1930 will be found in the following tables:

Revenue for Current Charges.

The Debt Burden.

The net funded or fixed debt of all municipalities at the close of the year 1930 was \$301,710,107, an increase over 1929 of \$17,578,305, or 6.2 per cent. The assessed valuation of taxable property increased during this period \$74,126,826, or one per cent. The total net funded or fixed debt January 1, 1932, was \$316,384,599, an increase of \$12,658,867 over January 1, 1931, or 4.2 per cent. For the cities, the net funded debt was \$261,608,916, an increase of \$10,660,074, or 4.2 per cent; for towns over 5,000 population it was \$42,044,794, an increase of \$301,457, or 0.7 per cent, and for towns under 5,000 population \$12,730,889, an increase of \$1,697,336, or 15.4 per cent. The large increase in debt in the small towns is accounted for chiefly in two towns which established water supply systems and one town which improved its water supply system for which loans aggregating \$1,148,000 were issued.

In addition to the above, there were loans in anticipation of revenue outstanding on January 1, 1932, aggregating \$41,369,247, but to meet this indebtedness there were uncollected taxes amounting to \$67,278,060. This temporary debt, with uncollected taxes as an offsetting asset, should not be considered with the net funded or fixed debt. The statute fixing October 15 as the date for payment of taxes, which are assessed as of April 1, makes necessary large temporary borrowings, most of the loans running for a few months and none for more than 12 months.

The initial contribution from revenue as a condition precedent to borrowing has been responsible for meeting a portion of the annually recurring charges for so-called permanent improvements, and it has definitely held in check the borrowing in many of the municipalities. It has also preserved a relatively low ratio of debt to assessed valuation as compared with other states. However, the debt is increasing proportionately faster than the assessed valuation, the valuation increasing 41.3 per cent and the debt 58.0 per cent since 1920. Only for the years 1925, 1928, and 1929 did the percentage of valuation increase at a greater rate than the debt. The shrinkage in the value of real estate, especially mill property, will undoubtedly place an additional burden on the home owner.

Improvements financed by loans ultimately cost from 10 to 60 per cent more than those paid from current revenue, and where large borrowings are made tax rates will show an upward trend. For many years attention has been directed to the debt burden, and admitting that what were considered luxuries in the past are considered necessities today, this theory, when brought into practice in municipal administration by unreasonably burdening private property for public improvements, is operating as a great hardship at the present time. Our recommendations, even when followed, have not prevented embarrassment to some of the cities and towns, but have, I believe, prevented a much worse condition that otherwise would exist.

THE CERTIFICATION OF TOWN AND DISTRICT NOTES.

This branch of the work continues to increase, the data collected for use in connection with the certification of notes being utilized more and more by the investors in municipal securities. Detailed information on the debt, showing the authority under

which loans are issued, the period of the loans, maturities, and the borrowing capacity, is in constant demand.

The number of notes certified and the amount of loans represented by them since the town note act took effect on January 1, 1911 are shown in the following table:

YEARS.	REVENUE AND OTHER TEMPORARY LOANS		GENERAL LOANS		TOTAL	
	Number	Amount	Number	Amount	Number	Amount
1911 . . .	983	\$8,974,214.59	433	\$737,349.43	1,416	\$9,711,564.02

¹ To June 1, 1932.

THE AUDITING OF ACCOUNTS AND THE INSTALLATION OF ACCOUNTING SYSTEMS.

During the past year, systems have been installed in four cities and towns. In addition, 202 audits and three special investigations have been made and assistance rendered in six other cities and towns. Systems have now been installed in 209 cities, towns and districts.

In carrying on this work, our examiners are expected to locate errors and discrepancies that may have been made, and, in addition, to assist the various officials in the preparation of statements regarding the finances, and to advise them as to procedure in carrying out the laws relative to municipalities.

The general advisory work is, in my opinion, especially valuable in view of the yearly changes in officials, the great increase in municipal activities, the general demand for more complete information as to the cost of carrying on the several municipal activities, and for a statement that shows the true financial condition of the municipality. The audit reports endeavor to make a report on the general work of the several departments and in particular on the methods of accounting or financing and on the financial condition.

The force of auditors, after years of training, are able to do more and better work, and, while we are unable to cause audits to be made as frequently as contemplated by the statutes, owing to the great demand for annual audits, no increase in the force is contemplated at this time.

CONCLUSION.

I wish to express my appreciation of the conscientious services rendered by the entire force, especially to Mr. Edward H. Fenton, Deputy Director and Chief Accountant, in charge of the auditing and installation of accounting systems, and to Miss Hannah M. Varney, in general charge of the clerical work and the preparation of the tabulations of this report.

Respectfully submitted,

THEODORE N. WADDELL,
Director of Accounts.

STATE HOUSE, Boston, June 1, 1932.

PLAN OF THE REPORT.

The statistical presentations of this report, following the introductory matter, are arranged in three principal parts, devoted respectively to the finances of (I) the 39 cities; (II) the 83 towns having a population of 5,000 or over; and (III) the 233 towns having a population of less than 5,000. In all the tabulations, unless otherwise indicated, the cities and towns are arranged in order of population for convenience of comparison.

PART I. — CITIES.

This part is subdivided as follows: — (A) Summary of Financial Transactions; (B) Receipts from Revenue; (C) Payments for Maintenance and Interest; (D) Indebtedness; and (E) Cash Balances.

(A) *Summary of Financial Transactions.*

This division consists of a summary table (designated Table I) or general survey of all the financial transactions of the 39 cities of the Commonwealth (pp. 4-27). The several cities, with the exception of Boston, which has financial transactions of such magnitude as to warrant presentation independently of the other cities, are arranged, for purposes of comparison, according to the population of the United States Census of 1930, typographical considerations making it necessary to adopt an arbitrary grouping of four municipalities to a page.

(B) *Receipts from Revenue.*

Table II (pp. 30, 31) shows receipts from *General* and Table III (pp. 32, 33) receipts from *Commercial* Revenue. The former consists of taxes, licenses and permits, fines and forfeits, grants and gifts, and all other general revenue; while the latter is composed of revenue from special assessments (whether for expenses or outlays), privileges, departmental earnings, public service enterprises, cemeteries, and interest.

Table IV (pp. 34-42) is an exhibit of classified Departmental Earnings (being the detail of Column D of Table III), from which may be seen the amount of revenue received by the several municipalities from their various departments. Unclassified receipts are excluded because of their diversity. This table is self-explanatory and is suggestive as disclosing the varying degree to which different cities have discovered opportunities for revenue from this source.

Table V (p. 43) is a tabulation of interest receipts classified so as to show the amount of interest derived from money on deposit, from deferred taxes and special assessments, from public trust funds (sub-classified according to particular funds, so far as is practicable), from investment funds, and from miscellaneous sources.

Table VI (p. 44) presents a summary of revenue receipts, giving within the scope of a single table in a form convenient for comparison the receipts from all sources of revenue of the 39 cities.

It is of interest to note that of the total revenue receipts of the 39 cities of the Commonwealth for the year covered by the report, 81.3 per cent is from general revenue sources and 18.7 per cent from commercial revenue sources. The revenue receipts of the city of Boston are 81.8 per cent from general and 18.2 per cent from commercial sources.

(C) *Payments for Maintenance and Interest.*

The tables in this division, VII to X, inclusive (pp. 46-68), exhibit gross payments, classified in detail, on account of the maintenance cost, or what are sometimes called the "current expenses" of the various departments or kinds of municipal services. Interest payments are similarly but separately shown, not only because it is desirable to exhibit this item of expense independently, but because interest is properly a capital rather than a departmental charge.

It would be most interesting and significant, too, if we could calculate the net cost of the several municipal services so as to show the actual burden of each upon the taxpayer, and it might be supposed that such a figure could be obtained simply by deducting the earnings of a department from the amount necessary to maintain it; but there is as yet on the part of accounting authorities no clear or general understanding as to what receipts should be treated as departmental earnings, thereby constituting a proper offset to expense, and what, on the other hand, being in the nature of an assessment upon the taxpayer rather than a charge upon the citizen, cannot

be legitimately deducted from a gross cost figure in order to obtain net cost of maintenance.

In comparing certain departmental expenses, large differences will occasionally be noted for the same class of service, the reason for which is not sufficiently apparent to warrant our attempting to assign it without more or less exhaustive inquiry. Meanwhile the differences, even for a single year, which may be noted in these comparative tables for cities of approximately the same size should stimulate local discussion for the purpose of ascertaining whether a satisfactory explanation can be found.

From the interest table (p. 68) we note that the total interest burden of the 39 cities for the year covered by the report was \$16,048,281.99, of which \$8,061,043.11, or 50.2 per cent, was interest on the general debt; \$2,009,040.51, or 12.5 per cent, was interest on revenue and other temporary loans; and the remaining 37.3 per cent of the total interest payments was for debt on account of public service enterprise and cemetery loans, metropolitan assessments for sewer, park, and water purposes, and miscellaneous debt not specified. It is of interest to note that the total assessment on the city of Boston for interest on metropolitan debts was \$1,847,572.31, or 24.4 per cent of the total interest burden of the city (see also payments to the state sinking and loan funds on page 73). Over 48 per cent of Somerville's total interest burden is on account of metropolitan assessments.

(D) *Indebtedness.*

Table XI (p. 70) shows the outstanding indebtedness classified by the character of the obligation; Table XII (p. 71), the relation of indebtedness to valuation, the valuation figures as reported to the Tax Commissioner being used; Table XIII (p. 72), the debt transactions for 1930, classified according to the character of the obligation; Table XIV (p. 73) shows separately the payments to the state sinking and loan funds; and Table XV (p. 74) shows the method of meeting debt requirements from taxation.

A tabulation which gives figures for the funded or fixed debt and the net debt only of a municipality does not, however, tell the whole story of the debt burden. Revenue loans, it is true, are not included in reckoning the limit of indebtedness under the law; but though they are temporary transactions with uncollected taxes presumably as an offsetting asset, they constitute in fact a permanent burden, since they are as a class annually recurrent. Loans in anticipation of bond issues, although of a temporary character, are in reality *fixed* debt (having no assets as an offset) and in Table XII are included in the total of funded or fixed debt and reckoned in determining the net debt. Table XI (p. 70) has therefore been prepared for the purpose of showing the aggregate outstanding indebtedness, including not only the funded or fixed debt, but also temporary debt and warrants or orders unpaid.

The net funded or fixed debt is found by deducting from the total funded or fixed debt the amount which has been set aside in sinking funds to pay the debt when due. Funded or fixed debt does not include revenue loans or outstanding warrants or orders, because these debts are considered temporary, and it is assumed that such obligations are offset by theoretically "quick" assets. Thus, revenue loans are offset by uncollected taxes, and warrants or orders by cash on hand.

The table of debt transactions (p. 72) is of interest as showing the amount of debt incurred during the fiscal year 1930 for the several purposes specified, and the amount of debt cancelled during the year, excepting payments to the state sinking and loan funds on account of metropolitan assessments for sewer, park, and water purposes, and payments to counties on account of debt incurred for bridge purposes. These payments represent the cancellation of a portion of the city's debt incurred by the State and County on their account, and for this reason are excluded.

Included in the term "General Loans" in the table of debt transactions are not only loans issued for general purposes, but likewise all loans whether specified as for school, fire, or police, etc., purposes, since these could not be shown separately by figures which would be comparable.

Payments to the state sinking and loan funds on account of miscellaneous items and metropolitan sewer, park, and water assessments are shown separately in Table XIV (p. 73). The aggregate amount thus paid for the 39 cities in 1930 was \$1,154,221.45 of which Boston paid \$729,127.36, or 63.2 per cent.

Table XV (p. 74) is of interest as showing the relative use by the 39 cities of Massachusetts of the two methods of meeting their debt obligations. The payments to

the state sinking and loan funds on account of miscellaneous items and metropolitan assessments are included in this table in order to show the annual debt charges against revenue, but they are *assessments* and not properly charged as a serial or municipal sinking fund payment.

(E) *Cash Balances.*

Table XVI (p. 76) shows the amount of cash on hand held by the treasurer and departments at the beginning and close of the fiscal year 1930.

PART II. — TOWNS OVER 5,000 POPULATION.

The subdivisions of this part are as follows: — (A) Summary of Financial Transactions; (B) Indebtedness; (C) Cash Balances.

The tables in Division A, *Summary of Financial Transactions* (pp. 80-125), are similar in form and detail to those given for the cities in Part I, the towns being arranged according to population, with the exception of Brookline, the largest town, which is presented separately as its transactions are scarcely comparable with those of any other town. The tables in the division devoted to *Indebtedness* (II, III, IV, V, and VI, on pp. 128-135, inclusive) are similar to those given for the cities, and the comments made in the latter connection are likewise applicable to the towns. The statements of *Cash Balances* (pp. 138, 139) for the towns are also self-explanatory.

PART III. — TOWNS UNDER 5,000 POPULATION.

The subdivisions of this part are as follows: — (A) Summary of Financial Transactions; (B) Indebtedness; (C) Cash Balances. They are presented on the same plan as the towns of over 5,000 population, which are shown in Part II.

TABLE XII. — *Relation of Indebtedness to Valuation — 1930.*

NOTE.—The valuation given in this table is the assessors' valuation of real and personal property, including motor vehicles, as of April 1, 1930, together with the supplemental assessment of December, 1930.

The total debt shown in this table is the funded or fixed debt. This amount differs from the total debt shown in Table XI, which includes funded or fixed debt and also temporary debt. If the amount of revenue loans and warrants or orders is deducted from the total debt shown in Table XI, the result will give the funded or fixed debt shown in Table XII.

¹ Railroad stock offsetting debt of \$163,000.

² Includes \$86,020.96 investment fund.

TABLE XIII. — *Debt Transactions for 1930 Classified by Character of Obligation.*

NOTE.—The amount of debt as shown in the following table does not include the sinking and loan fund payments to the State (see Table XIV, p. 73), or payments to counties on account of debt incurred for bridge purposes. For this reason the total amount of cancelled debt as here shown differs from that shown in Table I, Division A, pages 4 to 27, under the section "Municipal Indebtedness."

TABLE III. — *Relation of Indebtedness to Valuation — 1930.*

NOTE.—The valuation given in this table is the assessors' valuation of real and personal property, including motor vehicles, as of April 1, 1930, together with the supplemental assessment of December, 1930.

The total debt shown in this table is the funded or fixed debt. This amount differs from the total debt shown in Table II, which includes funded or fixed debt and also temporary debt. If the amount of revenue loans and warrants or orders is deducted from the total debt shown in Table II, the result will give the funded or fixed debt shown in Table III.

Towns. (Population over 5,000)	Popu- lation of 1930	Percent- age of Net Debt of Valua- tion	Valuation of 1930 including Motor Vehicles	Total Funded or Fixed Debt	Sinking Funds	Net Funded or Fixed Debt

TABLE IV. — *Debt Transactions for 1930 Classified by Character of Obligation.*

NOTE.—The amount of debt as shown in the following table does not include the sinking and loan fund payments to the State (see Table V, p. 134), or payments to counties on account of debt incurred for bridge purposes. For this reason the total amount of cancelled debt as here shown differs from that shown in Table I, Division A, pages 80 to 125, under the section "Municipal Indebtedness."

¹ Includes \$2,000 in anticipation of highway reimbursement from State and county.

TABLE III. — *Relation of Indebtedness to Valuation — 1930.*

NOTE.—The valuation given in this table is the assessors' valuation of real and personal property, including motor vehicles, as of April 1, 1930, together with the supplemental assessment of December, 1930.

The total debt shown in this table is the funded or fixed debt. This amount differs from the total debt shown in Table II, which includes funded or fixed debt and also temporary debt. If the amount of revenue loans, other temporary loans such as are found in Middleton and Holland (see footnotes on Table II), and warrants or orders is deducted from the total debt shown in Table II, the result will give the funded or fixed debt shown in Table III.

There are 63 towns which showed no funded or fixed debt.

Towns (Population under 5,000)	Popula- tion of 1930	Percent- age of Net Debt of Valua- tion	Valuation of 1930 including Motor Vehicles	Total Funded or Fixed Debt	Sinking Funds	Net Funded or Fixed Debt
1 Southborough . . .	2,166	10.7	\$3,455,095	\$369,300.00	—	\$369,300.00
2 Hanover . . .	2,808	10.6	3,824,944	407,000.00	—	407,000.00
3 Marshfield . . .	1,625	8.4	7,744,175	649,500.00	—	649,500.00
4 Southwick . . .	1,461	8.3	2,102,184	174,800.00	—	174,800.00
5 Wilmington . . .	4,013	7.8	4,656,670	363,000.00	—	363,000.00
6 Blandford . . .	545	6.1	941,463	57,700.00	—	57,700.00
7 Holden . . .	3,871	6.0	3,487,580	208,100.00	—	208,100.00
8 Norton . . .	2,737	5.4	2,571,940	138,150.00	—	138,150.00
9 Hanson . . .	2,184	5.4	2,781,863	149,000.00	—	149,000.00
10 Chester . . .	1,464	5.4	1,505,856	80,600.00	—	80,600.00
11 Ashland . . .	2,397	5.1	2,854,118	146,500.00	—	146,500.00
12 Bedford . . .	2,603	4.8	3,173,505	152,400.00	—	152,400.00
13 Hopkinton . . .	2,563	4.0	2,831,445	132,000.00	\$20,000.00	112,000.00
14 Longmeadow . . .	4,437	3.7	11,230,450	419,500.00	—	419,500.00
15 Brookfield . . .	1,352	3.7	1,409,637	52,000.00	—	52,000.00
